# PVC & CPVC GLUE CALCULATION CHART

*Average Number of Joints Assembled Per Quart of Glue*

Pipe Diameter	1/2"	3/4"	1"	1 1/2"	2"	3"	4"	6"	8"	10"	12"	15"	18"
# of joints/quart	300	200	125	90	60	40	30	10	5	2 to 3	1 to 2	0.75	0.5

To calculate glue requirements:

- 1.) Identify the size of the pipe/fittings that you will work with
- 2.) Determine the number of joints that you will need to glue
- 3.) Divide the number joints to be glued by the number of joints (identified above) that a single quart of glue will join.
